Enhanced Client Billing

Open Sky Group Enhanced Client Billing for 3PLs enables real-time capture of billable activities performed within a WMS or other management system.

- Supports the ability to accurately calculate client level, cost-to-serve metrics

- Provides a clear audit trail for invoice reconciliation with clients, based on actual WMS activities

- Scales easily with cloud-based architecture and standard API communications

Enhanced Client Billing (ECB) deploys conveniently on the cloud for seamless integration with any warehouse management system (WMS), enabling direct data extraction from the WMS for accurate, automated, up-to-date invoice processing.

Are you manually entering data with errors and/or billing omissions?

Want to reduce processing costs and errors by automating manual tasks while being able to re-purpose valuable staff?

Looking to automatically capture all tasks performed in your warehouse, transfering details to specific client invoices?

Benefits of Enhanced Client Billing

ECB validates billing information, including existing rates, expired rates, missing rates, missing events, and other details without human intervention, flagging exceptions for approval before dispatching the bill directly to the client and helping to stop revenue leakage.

Maximize Revenue

- Eliminates manual data entry errors and/or billing omissions

- Captures billing activities automatically, supporting improved overhead utilization/ cost and reducing revenue leakage

- Assesses client-level profitability via accurate cost-to-serve metrics and analytics

- Creates verified audit trail of billing events and charges, reducing potential credit settlements

Improve Efficiencies

- Provides flexible invoicing capabilities with as much or as little detail as desired, with the option to send immediately or at a scheduled time with the option to approve electronically

- Allows client cloning and transaction approval to be turned on or off by client

- Multi-lingual (base includes English and Spanish)

Competitive Advantage

- Allows those operating on multiple WMS platforms to have a single, standardized billing system via its system agnostic, cloud architecture

- Integrates to customer accounting systems

- Allows billing charges to be received from additional systems (i.e., timecards) and consolidated, then billed

- Uses effective dates to allow for smooth rate transitions

Awards & Recognition

Open Sky Group's talented advisors leverage their deep experience and expertise to make sure your operation runs effectively and efficiently. With offices in North America, Europe, and APAC, Open Sky Group experts are based in key cities across the world. Open Sky Group strives every day to be the best independent supply chain advisors on the planet.
